

OFFSHORE

Ex-proof sub-sea slip ring

- Number of Rings: 16
- Rated Voltage: 1,5 kV
- Rated Current: 15 Amps.
- Gold wire brushes on gold plated rings
- Pressure-proof: 100 bar
- Weight: 20 kgs
- Dimension: Ø 104 mm / height 285 mm
- Main Housing: Stainless steel
- Connectors: water tight

SCHLEIFRING

This electrical slip ring assembly is designed for sub-sea application. The slip ring is transmitting power, video and sonar signals.

The complete housing is made of stainless steel in accordance with AISI 316 L. The housing is oil filled and a special pressure equalization diaphragm is used.

The complete slip ring assembly is pressure-proof up to 100 bar.
